INFO

Strong foundation in C++ and Data Structures and Algorithms(300+ Leetcode), passionate about problem-solving and building impactful projects.[click here](#).

WORK EXPERIENCE

CantiLever

June 2025 - July 2025

During my internship at Cantilever, I developed an Inventory Management System in C++ to manage product records, stock updates, and retrieval operations, and built a Simple Social Network App featuring user profiles, friend connections, and basic interactions. These projects strengthened my skills in object-oriented programming, problem-solving, and system design while providing hands-on experience with real-world applications.

PROJECTS

Digi-Mart

[Link to Repo](#)

Built a React-based e-commerce web app 'Digi Mart' showcasing electronic products with features like product listing, shopping cart, and a user-friendly interface, gaining practical experience in frontend development.

Inventory-Management

[Link to Repo](#)

Developed an Inventory Management System in C++ to manage electronic records, track stock levels, and enable efficient retrieval and updates, applying concepts of data structures and object-oriented programming for real-world use cases.

Employee-Management

[Link to Repo](#)

Built a React-based Employee Management System with features for adding, updating, and managing employee records, focusing on clean UI, CRUD operations, and efficient state management.

SKILLS

Programming Languages	Python, C, C++, Java, JavaScript
DSA	300+ Leetcode, Good Problem-Solving Approach
MERN Stack	HTML, CSS, JavaScript, React.js, MongoDB, Express, Next.js, MySQL
Libraries and Frameworks	GSAP, Three.js, Tailwind CSS, Python Libraries
Tools	Git, Github, VsCode, Cursor
Soft Skills	Leadership, Problem-solving, Collaboration, Communication

EDUCATION

2023-2027	BTech in Information Technology, MAIT(GGSIPU)	(CGPA:8.5)
2022	12th, GOVT BOYS SR SEC SCH 1 C-BLK YAMUNA VIHAR, CBSE	(93.4)
